						On Wych Elm on Platform 1, noted 2 small, fast dark butterflies, which were clearly hairstreaks; 13:07 train was coming in so caught it and went to unnn for meeting. Came back on 15:54 and went round to Platform 1 for a quick recce. After about 10 minutes one of the hairstreaks appeared and landed high up on a small branch. I couldn't pick it up on the camera viewer but took a series of shots saturating the area and amazingly it's actually visible on
